Dark gray  
Similar to RAL7004

Yellow  
Similar to RAL1018

White  
Similar to RAL1102

Yellow-green  
Applied to earth terminal

### COLORS AND MARKING

We have many sets of high precision injecting machine. All the machines can process a variety of high precision injecting products, in order to meet all kinds of components and customer's needs. Also, our factory is using concentrated dry feeding system and automatic suction machine, so that the machines can supply material automatically. We only need one person to run this production line, which is the best part of our precision injecting machines. Furthermore, we do make special features in the plastic housing to prevent mismatching, increase creeping distance or prevent PCB parts to have wrong orientation. In addition to this we do special marking and even special color if needed.

Terminal blocks and headers can be marked by different methods. We offer our customers two kinds of printing: ink-jet printing, the cost-effective, fast and flexible solution to print letters or individual characters. The tampon printing is also available. The Tampon print guarantees the best quality and definition. A variety of letters and characters are possible, even on corners and round surfaces. Both types of printing are wipe-proof; the tampon-printing method is also resistant to isopropyl alcohol.
